Education

Cebu Institute of Technology - University — *Cebu City, Cebu*
4th Year BS in Computer Science, GPA: 4.3-4.5

Technical Skills

Frameworks and Libraries: ReactJS, Django, TailwindCSS, NodeJS, Node.js, React Native and Query

Programming Languages: C, C++, Python, Java, PHP, JavaScript, SQL

Database: MySQL, Firebase, SQLite, PostgreSQL, MongoDB, Supabase

Experience

Full-Stack Developer Intern

Accenture Inc. Philippines — Cebu City, Cebu

June 2025 - August 2025

Certifications

- AWS Academy Graduate - Cloud Architecting (Training Badge)
- AWS Academy Graduate - Cloud Foundations (Training Badge)
- Zuit JavaScript Elective Course Program

Research & Publications

- Bitayo, B., et al. "Uncertainty-Aware Temporal Transformer Modeling with Masked Self-Attention and Missingness Encoding for Early Sepsis Risk Stratification from ICU Time-Series Data" 26th Philippine Computing Science Congress, 2026.
- Bitayo, B., et al. "MoodleQuest: Gamified Engagement for Asynchronous Learning." 12th International Conference on Education and Training Technologies, 2026.

Projects

Early Sepsis Risk Stratification — An advanced deep learning framework for early sepsis detection in ICU settings using Transformer neural networks. Features masked self-attention and explicit missingness encoding to handle irregular, sparse clinical data.

MoodleQuest — A gamified companion system for Moodle courses that uses quests, XP, badges, and leaderboards to boost student engagement in asynchronous learning.

CommitSensei — Analyzes any GitHub profile and summarizes what a developer has built, their top languages, and activity in one page.

DataExplorer — Drop in a CSV or JSON file and instantly get column summaries, interactive charts, and data export — no backend needed.

RRLFinder — Research assistant that helps students quickly find and organize related literature sources for academic papers.

Digimage Processing — Digital Image Processing desktop application built with C# 12 and .NET 8 for Windows.

Bisaya++ Interpreter — A Cebuano-based programming language interpreter handling tokenization, parsing, and execution.

Discere Flashcards — A flashcard and quiz platform for students to create organized decks, take interactive quizzes, and track study progress.

GPTA-Bankal Tracker — Full-stack app for managing and tracking student payment requirements and collections for a school organization.

Discord Bot — Personal automation bot that connects APIs and services to reduce repetitive manual tasks.
